International Journal of
SATELLITE COMMUNICATIONS (*Int. J. Satell. Commun.*)

CONTENTS

VOLUME 14, ISSUE Nos 1–6

ISSUE No. 1 January–February

Geostationary Station-keeping by Ion Thrusters: Genetic Algorithms Optimization: F. Palutan, D. De Martino, S. Falzini and M. Melis 1

Performance of Combined Free/Demand Assignment Multiple-access Schemes in Satellite Communications: T. Le-Ngoc and S. V. Krishnamurthy 11

Complex CDMA versus FDMA/SCPC for Low and Medium Bit Rate Applications for Fixed Satellite Services: S. Cacopardi, F. Frescura, F. Martinino and G. Reali 23

A Mathematical Model Describing the Effects of Pointing and Tracking Errors due to 'Mechanical Noise' in Coherent Optical Intersatellite Links: C. Correll 37

Application of Frequency Diversity for Dimensioning a K_a-Band Satellite System: M. Luglio 53

A Procedure for Determining Auxiliary Co-ordination Contours for Hydrometeor Scatter Interference: M. Thurai, J. F. Goddard and P. Lundborg 63

ISSUE No. 2 March–April

Cochannel Interference in Satellite Communication Systems Derived from Rain Attenuation Measurements at 20 GHz: E. Matricciani and M. Mauri 71

Design of Multibeam Satellite Communications Networks Realized by SS/FDMA: H. Shinonaga and Y. Ito 77

Comparison between Distributed and Centralized Demand Assignment TDMA Satellite Access Schemes: N. Celandroni, E. Ferro and F. Potortì 95

Experimental Results of a Demand-assignment Thin Route TDMA System: N. Celandroni, E. Ferro and F. Potortì 113

ISSUE No. 3 May–June

Special issue on the Advanced Communications Technology Satellite
Guest Editor: Thomas C. Jedrey

Introducing our Guest Editor—Thomas C. Jedrey: B. G. Evans 127

Editorial: T. C. Jedrey 129

Advanced Communications Technology Satellite (ACTS): Design and On-orbit Performance Measurements: F. Gargione, R. Acosta, T. Coney and R. Krawczyk 133

Gigabit Satellite Network for NASA's Advanced Communication Technology Satellite (ACTS): D. Hoder and M. Bergamo 161

ACTS Mobile Terminals: B. S. Abbe, M. J. Agan and T. C. Jedrey 175

Visit the Wiley Home Page
In the United States you will find us at: http://www.wiley.com
and
in Europe at: http://www.wiley.co.uk

Abstracted/indexed by Cambridge Scientific Abstracts, Current Contents/ Eng, Tech & Applied Sciences, Engineering Index, Information Reports & Bibliographies, INSPEC, Research Alert (ISI), SCISEARCH Databases (ISI) and Telecommunications Abstracts

A Frequency Offset Estimation and Compensation Algorithm for K/Ka-band Communications: T. C. Jedrey, E. H. Satorius and M. J. Agan 191

Innovative Networking Concepts Tested on the Advanced Communications Technology Satellite: D. Friedman, S. Gupta, C. Zhang and A. Ephremides 201

National Security/Emergency Preparedness and Disaster Recovery Communications via ACTS: C. R. Pasqualino, B. S. Abbe and F. Dixon 219

ACTS Aeronautical Experiments: M. J. Agan, D. I. Nakamura, A. D. Campbell, R. H. Sternowski, W. A. Whiting and L. Shameson 233

Satellite-enhanced Personal Communications Experiments: D. S. Pinck and L. H. Tong 249

High Bit Rate Experiments over ACTS: L. A. Bergman, J. P. Gary, B. Edelson, N. Helm, J. Cohen, P. Shopbell, C. R. Mechoso, C. Chun, M. Farrara and J. Spahr 259

Ka-band Propagation Research using ACTS: F. Davarian 267

K-band Land-mobile Satellite Channel Characterization using ACTS: M. Rice, J. Slack, B. Humpherys and D. S. Pinck 283

Analysis of a Rain Compensation Algorithm for K/Ka-band Communications: E. H. Satorius and L. H. Tong 297

ISSUE No. 4 July–August

A Multiple-channel Free-access Collision Resolution Algorithm Based Connection Request Procedure for Land Mobile Satellite Networks: H. H. Tan and T.-Y. Yan 313

A Cascadable Pragmatic Block Decoding Algorithm Exploiting Channel Measurement Information: W. H. Thesling and F. Xiong 327

A Markov Model for Correlated Land Mobile Satellite Channels: E. Lutz 333

A Fade-compensation Technique for Digital Land Mobile Satellite Systems: H. K. Lau and S. W. Cheung 341

A Quasi-constant Envelope Quadrature Overlapped Modulation and its Performance over Non-linear Band Limited Satellite Channels: X. H. Chen and J. Oksman 351

Computer Simulation Techniques for a Mobile Satellite Communication Channel: Y.-S. Liu 361

GPS-based LEO Satellite Position and Attitude Determination Augmented by Pseudolites on Earth: W. M. Rupp 373

ISSUE No. 5 September–October

Transmission Performance Evaluation of Voice Encoding Technology for the Inmarsat Mini-M System: S. Dimolitsas, F. L. Corcoran, C. Ravishankar, A. Wong and S. F. de Campos Neto 381

An ATM-like System Architecture for Satellite Communications Including On-board Switching: A. Baiocchi, M. Listanti, N. Blèfari-Melazzi and C. Soprano 389

Performance Study of an Integrated Satellite/Terrestrial Mobile Communication System: M. Mohorcic, G. Kandus, E. Del Re and G. Giambene 413

Robust Data Link Protocols for Connectionless Service over Satellite Links: N. K. G. Samaraweera and G. Fairhurst 427

ISSUE No. 6 November–December

Radio and Network Comparisons for MSBN and GSM Systems in a Geostationary Satellite Environment: F. Delli Priscoli and F. Muratore 439

Reduced Complexity Frequency Estimator for Burst Transmission: C. Bergogne, P. Sehier and M. Bousquet 455

Future Multimedia Communications via Satellite: B. G. Evans and R. Tafazolli 467
